

What is claimed is:

1. An article for protecting the edges of a piece of furniture comprising:
a one piece unitary body; and
attachment means for attaching the article to a piece of furniture.
2. The article of claim 1 wherein the body is formed of a lightweight transparent material.
3. The article of claim 1 wherein the body has a triangular shape formed of a base and two angularly disposed sides extending from the base.
4. The article of claim 3 further comprising:
apertures formed in the sides for weight and material reduction.
5. The article of claim 3 wherein the sides are disposable at an angle adapted to be disposed over portion of two adjacent panels of a piece of furniture defining an edge.
6. The article of claim 3 wherein the sides are disposed at a 90° angle with respect to each other.
7. The article of claim 3 wherein the attachment means comprises:
at least one aperture formed in at least one of the base and a leg extending from the base.
8. The article of claim 1 wherein the body comprising:
first and second angularly disposed legs, each having a substantially planar shape.

9. The article of claim 8 further comprising:
apertures formed in the first leg for weight and material reduction.
10. The article of claim 8 wherein the legs are disposed at an angle
to be mounted on a horizontally extending edge of one panel of a piece of furniture.
11. The article of claim 8 wherein the first and second legs are
disposed at a 90° angle.
12. The article of claim 8 wherein the attaching means comprises:
at least one aperture formed in one of the first and second legs for
receiving at least one fastener for mounting the body to a piece of furniture.
13. An article of furniture comprising:
a front panel;
a back panel;
a side panel;
an interior frame supporting the front panel, the side panel and back
panel;
a plurality of legs coupled to the interior frame;
a one piece unitary edge protector body; and
attachment means for attaching the body to the article of furniture.
14. The article of claim 13 wherein each furniture leg is attached to
the interior frame by a threaded shank.
15. The article of claim 14 wherein the attachment means comprises:
an aperture in the body receiving the threaded shank of one leg to attach
the body over an edge on the article of furniture.

16. The article of claim 15 wherein a vertically extending edge is formed between adjoining ends of the front panel, the side panel and the back panel of the article of furniture.

17. The article of claim 16 wherein an edge is formed on one of the front panel, the side panel and the back panel.

18. The article of claim 13 wherein the body has a triangular shape formed of a base and two angularly disposed sides extending from the base.

19. The article of claim 13 wherein the body comprises:
first and second angularly disposed legs, each having a substantially planar shape.
